

# CALCULATOR CRUNCH

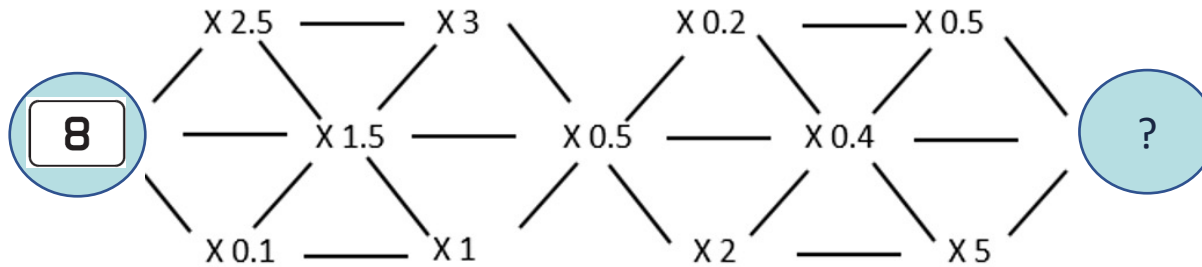

Day 5

## A-maze-ment!

Start with the number **8** on your calculator.

Find a route through the grid from left to right only visiting each multiplier once.

1. How many different outcomes are there for the maze?
2. What is the highest outcome?
3. Can you find end values that are less than one?
4. How many whole number outcomes can you make?

Set a target for a friend to make
